Resolving the spatial and cellular architecture of lung adenocarcinoma by multiregion single-cell sequencing

**SUPPLEMENTARY DATA FILE 4** 

**Supplementary Figure S9** 

## Supplementary Fig. S9

## Supplementary Fig. S9. Robustness of CNV inference in C9 cells from P3 and P5.

**A,** Heatmaps showing CNV scores of cells in the malignant-enriched cluster of P3 using NK cells (left), B cells (middle), T cells (right) as background references. **B,** Heatmaps showing CNV scores of cells in the malignant-enriched cluster of P5 using NK cells (left), B cells (middle), T cells (right) as background references.
