

**Supplementary Figure S1:** A) mRNA levels of *ANRIL*, *p14/ARF*, *p16/CDKN2A* and *p15/CDKN2B* in 22 normal human tissues. Dendrogram of these four genes, constructed using hierarchical clustering, according to their expression profiles in the 22 normal human tissues. B) mRNA levels of *ANRIL*, *p14/ARF*, *p16/CDKN2A* and *p15/CDKN2B* in 12 breast tumor tissues. Dendrogram of these four genes, constructed using hierarchical clustering, according to their expression profiles in the 12 breast tumor tissues.
