

Supplementary Table 2. Putative tumor suppressor genes with miR-93 and miR-130b target sites		
Gene Name	Number of predicted miR-93 binding site: Free energy of the binding site	Number of predicted miR-130b binding site: Free energy of the binding site
Homo sapiens B-cell translocation gene 1, anti-proliferative (BTG1), mRNA.	1: -19.31	1: -17.40
Homo sapiens glucocorticoid receptor DNA binding factor 1 (GRLF1), transcript variant 1, mRNA.	1: -22.7	1: -30.4
Homo sapiens interferon regulatory factor 1 (IRF1), mRNA.	1: -20.1	1: -21.2
Homo sapiens SAM and SH3 domain containing 1 (SASH1), mRNA.	2: -18.5	1: -19.3
	-17.3	
Homo sapiens tumor protein p53 inducible nuclear protein 1 (TP53INP1), mRNA.	2: -18.6	2: -16.9
	-23.7	
		1: -19.2
